Town of Paradise Valley License Plate Readers September 2015 Activity

Paradise Valley Police Officers made two (2) arrests of individuals subject to other law enforcement agencies' misdemeanor warrants. Each of the arrestees was taken into custody without incident and were turned over to the appropriate law enforcement agency.

LPR also identified one (1) stolen vehicle. Officers were dispatched to the area and found the vehicle traveling on Tatum Blvd where a felony stop was conducted. The driver was taken into custody without incident and the vehicle recovered.

LPR technology works by comparing an established list of wanted license plates produced by the Department of Public Safety and amended by the Paradise Valley Police Department against license plates captured by the LPR's at all locations. If a match is identified, police dispatch and active patrol cars will be alerted and further action will follow. Officers review the LPR information prior to stopping the motorist.

Privacy matters. The Town of Paradise Valley takes its responsibility to protect the data generated by this technology seriously and has established policies consistent with state law regarding retention, use and release.
