(Generally it is desirable to have the address on the same street as the "Front Yard Designation". That is based upon: 1) The location of the door used by the general public, 2) The frontage as designated on the subdivision plat, 3) The frontage that is consistent with and in harmony with the neighborhood and 4) The frontage that is on the lower level street; i.e. on a local street rather than a collector or on a collector rather than on an arterial.)
