CHIMNEY HEIGHT CERTIFICATION (ALL ZONING)
FOR PRIMARY BUILDING

(Name of Engineering or Land Surveying Firm)

(Date)

(Mailing Address of Firm)

(Name of Contractor)

(Job Site Address) (Permit Number)

The height or vertical distance of the chimney must be certified from the lowest point of the natural grade or the lowest un-restored excavated grade below the structure to the highest point of the chimney.

I certify that the elevation of the chimney height(s) of the _____ is:
(Type of Structure Being Built)

_____ feet (above sea level) at the lowest point of the natural grade or lowest un-restored excavated grade below the structure

Chimney 1: _____ feet (above sea level) from the highest point of the chimney (including spark arrester).

Chimney 2: _____ feet (above sea level) from the highest point of the chimney (including spark arrester).

Chimney 3: _____ feet (above sea level) from the highest point of the chimney (including spark arrester).

Chimney 4: _____ feet (above sea level) from the highest point of the chimney (including spark arrester).

Accordingly, the total height of Chimney 1 is _____ feet

Chimney 2 is _____ feet

Chimney 3 is _____ feet

Chimney 4 is _____ feet

Measured from the lowest point of the natural grade or the lowest un-restored excavated grade below the structure to the highest point of the chimney (including spark arrester).

OR

Check if applicable:

The tallest chimney is _____ feet high and all other chimneys are _____ feet high or lower, measured from the lowest point of the natural grade or the lowest un-restored excavated grade below the structure to the highest point of the chimney (including spark arrester).

(Engineer/Surveyor's Signature)

(Engineer/Surveyor's Stamp)
